

Index

Note: Page numbers of article titles are in **boldface** type.

A

Additives

- in pet foods
- myths and misperceptions about, 695–696

Age

- as factor in macronutrients in feline health, 704–705

Aging

- sarcopenia of
- diabetes mellitus in cats and, 781
- hyperthyroidism in cats and, 777–778

Aging cats

- nutrition of, **761–774**. *See also* Nutrition, of aging cats
- physical and nutritional evaluation of, 762–763

Aging dogs

- defined, 741–742
- nutrition of, **741–759**. *See also* Nutrition, of aging dogs
- physiologic changes in, 743–747
 - brain, 746
 - gene expression, 746
 - gut microbiota, 745
 - immune health, 746
 - nutrient absorption, 744–745
 - special senses and metabolic flexibility, 746–747
- working and service dogs
 - diet for, 730–733

Allergies

- grains and
- myths and conceptions about, 692

Alternative diet(s)

- assessment of, 671–681
 - laboratory data in, 686
 - North American pet food regulations, 671–674
 - nutritional adequacy determination in, 674–681
 - patient-related, 681–686
- for cognitive dysfunction in aging dogs, 749
- described, 669–670
- requests from pet owners
 - handling of, **667–688**
 - introduction, 668

Animal source proteins

- vs. vegetable source proteins

Animal (*continued*)

in pet foods

myths and misperceptions about, 694–695

Antioxidants

for cognitive dysfunction in aging dogs, 748–749

B

Body composition

in aging cats

nutritional requirements related to, 763–764

Body condition scores

alternative diet effects on, 683–684

in working and service dogs, 724–725

Body weight

in aging cats

nutritional requirements related to, 763–764

alternative diet effects on, 683–684

as factor in obesity management in cats, 791

macronutrients in cats effects on, 705–709

Brain

aging effects on, 746

C

Carbohydrate(s)

in cats

aging, 764–765

diabetes mellitus and, 782

health-related, 703

hyperthyroidism and, 779

in pet foods

myths and misperceptions about, 692–693

vs. fats

in weight gain, 708–709

in working and service dogs, 721–723

timing and strategy for, 726

Cat(s)

aging. *See* Aging cats

diabetes mellitus in, 780–783

dietary management of, 780–783. *See also* Diabetes mellitus, in cats

endocrine disease in

dietary management of, **775–788**. *See also* Feline endocrine disease, dietary management of

macronutrients in, **699–717**. *See also* Macronutrient(s), in feline health

nutritional assessment of, 653–659. *See also* Nutritional assessment, of dogs and cats

Chondroitin and glucosamine

for degenerative joint disease in aging dogs, 751

Chronic kidney disease

in cats

aging

nutritional requirements for, 768–769

- hyperthyroidism and, 777
- prevention of

- macronutrients in, 711

Cognitive dysfunction

- in aging dogs

- nutritional management for, 748–749

Commercial pet foods

- ingredients in

- myths and misperceptions about, **689–698**

- additives and preservatives, 695–696

- animal vs. vegetable source proteins, 694–695

- cooking effects on quality and digestibility of nutrients, 695

- grains, 691–693

- meat or poultry by-products and meals, 693–695

- terminology, 690–691

Cooking

- effects on quality and digestibility of nutrients

- in pet foods

- myths and misperceptions about, 695

- extrusion, 695

D

Degenerative joint disease

- in aging dogs

- nutritional management of, 750–751

Diabetes mellitus

- in cats, 780–783

- aging

- nutritional requirements for, 767–768

- management goals, 781–782

- metabolic problems related to, 780–781

- nutritional strategies, 782–783

- prevention of

- macronutrients in, 709–711

- overt

- hyperthyroidism in cats and, 776–777

Diet(s)

- conventional vs. unconventional, 668–669

- in feline endocrine disease management, **775–788**. *See also* Feline endocrine disease,

- dietary management of

- helping owners select, 649

Dietary fiber

- in working and service dogs, 726–727

Dog(s)

- aging. *See* Aging dogs

- nutritional assessment of, 653–659. *See also* Nutritional assessment, of dogs and cats

E

Electrolyte(s)

- in working and service dogs, 727–729

Endocrine disease

feline

dietary management of, **775–788**. *See also* Feline endocrine disease, dietary management of

Energy

in aging cats

nutritional requirements for, 763

in aging dogs

nutritional management for, 747

nutritional demands for, 721–723

Exercise

for working and service dogs, 724–725

Extrusion cooking, 695

Eye(s)

alternative diet effects on, 685

F

Fat(s)

in aging cats, 764–765

in feline health, 701–702

vs. carbohydrates

in weight gain, 708–709

in working and service dogs, 721–723

beyond energy, 725–726

Feces

alternative diet effects on, 684

Feline cognitive dysfunction syndrome

in aging cats

nutritional requirements for, 767

Feline endocrine disease. *See also specific diseases, e.g.,* Hyperthyroidism, in cats

dietary management of, **775–788**

diabetes mellitus, 780–783

hyperthyroidism, 776–780

introduction, 775–776

Fiber

dietary

in working and service dogs, 726–727

G

Gene expression

aging effects on, 746

Glucosamine and chondroitin

for degenerative joint disease in aging dogs, 751

Glucose intolerance

hyperthyroidism in cats and, 776–777

Glucose toxicity

diabetes mellitus in cats and, 781

Grains

in pet foods

myths and misperceptions about, 691–693

Green-lipped mussel extract

for degenerative joint disease in aging dogs, 750–751

Gut microbiota

aging effects on, 745

H

Hyperglycemia

in cats

diabetes mellitus and, 781

hyperthyroidism and, 776–777

Hyperparathyroidism

secondary

hyperthyroidism in cats and, 777

Hyperphosphatemia

hyperthyroidism in cats and, 777

Hyperthyroidism

in cats, 776–780

aging

nutritional requirements for, 770–771

management goals, 778–780

metabolic problems related to, 776–778

nutritional strategies, 778–780

I

Immune health

aging effects on, 746

Immunity

declining

in aging dogs

nutritional management for, 749–750

Insulin resistance

in cats

diabetes mellitus and, 781

hyperthyroidism and, 776–777

Insulin secretion

decreased

diabetes mellitus in cats and, 781

K

Kidney disease

chronic. *See* Chronic kidney disease

L

Label(s)

pet food, 649–653

Long-chain omega-3 polyunsaturated fatty acids

in aging dogs

Long-chain (*continued*)

for cognitive dysfunction, 749

for degenerative joint disease, 750

Lower calorie density

in obesity management in pets, 795

M

Macronutrient(s)

in feline health, **699–717**

age as factor in, 704–705

body weight-related, 705–709

in disease prevention, 709–711

introduction, 699

preferences of cats, 703–704

requirements for, 700–703

carbohydrate, 703

fats, 701–702

protein, 700–701

Macronutrient profile

in obesity management in pets, 795

Meat by-products and meals

in pet foods

myths and misperceptions about, 693–695

Metabolic flexibility

aging effects on, 746–747

Microbiota

gut

aging effects on, 745

Micronutrient profile

in obesity management in pets, 795

Minerals

in working and service dogs, 727–729

Muscle condition scores

alternative diet effects on, 683–684

Muscle wasting

in cats

diabetes mellitus and, 781

hyperthyroidism and, 776

N

North American pet food regulations, 671–674

Nutrient(s)

absorption of

aging effects on, 744–745

in obesity management in pets, 795

in pet foods

cooking effects on quality and digestibility of

myths and misperceptions about, 695

Nutrient sensitivity

disorders with, 646–647

Nutrition

of aging cats, **761–774**. *See also* Aging cats

disease-related, 767–771

chronic kidney disease, 768–769

diabetes mellitus, 767–768

feline cognitive dysfunction syndrome, 767

hyperthyroidism, 770–771

osteoarthritis, 769–770

introduction, 761–762

requirements, 763–766

balancing diet, 764–765

body weight– and composition–related, 763–764

energy-related, 763

feeding management, 765–766

of aging dogs, **741–759**. *See also* Aging dogs

assessment of, 742–743

discussion, 751–752

disease-related, 748–751

cognitive dysfunction, 748–749

declining immunity, 749–750

degenerative joint disease, 750–751

introduction, 741–742

physiologic changes affecting, 743–747

management of, 747–748

reassessment and treatment adjustment, 751

relevance of, 741

diseases and, 646–647

myths and misconceptions about, 661–663

for working and service dogs, **719–740**. *See also* Working and service dogs, nutrition for

Nutritional assessment

defined, 653, 655

of dogs and cats, 653–659

dietary and feeding management plan, 655–659

integration into general practice, 659–661

screening and extended evaluations, 655

Nutritional concepts

for veterinary practitioner, **645–666**

introduction, 645–646

O

Obesity

diabetes mellitus in cats and, 781

in pets

clinical considerations, 791

clinical diseases associated with, 792

consequences of, 791–792

costs related to, 791

management of, **789–806**

diet selection in, 794–796

Obesity (*continued*)

- energy restrictions in, 796–797
- human–animal interaction in, 797–800
- initial approach to, 793–794
- introduction, 789–791
- partnering with pets in, 801

- perception of, 791
- prevention of, 792–793
 - human–animal interaction in, 797–800
- quality of life effects of, 792
- risk factors for, 790
- status of, 790

Osteoarthritis

- in aging cats
- nutritional requirements for, 769–770

P

Pet food(s)

- commercial
- ingredients in
 - myths and misperceptions about, **689–698**. *See also specific ingredients and*
 - Commercial pet foods, ingredients in, myths and misperceptions about
- evaluation of, 647–648

Pet food labels, 649–653

Pet food marketing

- terminology, 654

Pet owners

- alternative dietary requests from
 - handling of, **667–688**. *See also* Alternative diet(s)
- dietary options available to, 670–671

Phosphorus

- in aging dogs, 748
- hyperthyroidism in cats and, 779–780

Physical activity

- energetic cost of
 - in working and service dogs, 719–721
- in obesity management in pets, 797

Poultry by-products and meals

- in pet foods
- myths and misperceptions about, 693–695

Preservatives

- in pet foods
- myths and misperceptions about, 695–696

Protein(s)

- animal source
- vs. vegetable source
 - in pet foods
 - myths and misperceptions about, 694–695
- in body weight, 705–708

- in cats
 - aging, 764–765
 - diabetes mellitus and, 782–783
 - health-related, 700–701
 - hyperthyroidism and, 778–779
- in dogs
 - aging, 747–748
 - working and service dogs, 723–724

S

- Sarcopenia of aging
 - in cats
 - diabetes mellitus and, 781
 - hyperthyroidism and, 777–778
- Senses
 - aging effects on, 746–747
- Service dogs
 - nutrition for, **719–740**. *See also* Working and service dogs, nutrition for
- Skeleton
 - alternative diet effects on, 685–686
- Skin and coat
 - alternative diet effects on, 684–685
- Sodium
 - in aging dogs, 748

T

- Treats
 - in obesity management in pets, 795–796

V

- Vegetable source proteins
 - vs. animal source proteins
 - in pet foods
 - myths and misperceptions about, 694–695
- Vision
 - alternative diet effects on, 685
- Vitamins
 - in working and service dogs, 727–729

W

- Weight gain
 - carbohydrates vs. fats in, 708–709
 - diabetes mellitus in cats and, 781
- Weight loss
 - in cats
 - diabetes mellitus and, 781
 - hyperthyroidism and, 776

Weight (continued)

- in pets

- in obesity management, 796–797

Working and service dogs

- body condition and exercise for, 724–725

- future

- diets for, 733–734

- geriatric

- diet for, 730–733

- nutrition for, **719–740**

- dietary fiber, 726–727

- electrolytes, minerals, and vitamins, 727–729

- energetic cost of activity, 719–721

- energy and demand, 721–723

- fats and carbohydrates, 721–723, 725–726

- feeding strategies, 729–730

- introduction, 719

- protein, 723–724
